# TIRZEPATIDE

Tirzepatide is a once weekly injectable peptide that acts on two hormones (GLP-1 and GIP) to improve blood glucose control and support effective weight loss.

Tirzepatide 30MG Vial

Tirzepatide 60MG Vial

## BENEFITS

- ✓ Powerful reduction of body weight
- ✓ Improved blood glucose control
- ✓ Reduced insulin resistance
- ✓ Helps lower glycated hemoglobin (HbA1c)
- ✓ Promotes satiety and appetite reduction
- ✓ Contributes to improved lipid profile
- ✓ Potential cardiovascular benefits
- ✓ Weekly dosing, improving treatment adherence

# RETATRUTIDE

Retatrutide is an injectable peptide that activates three hormones (GLP-1, GIP, and glucagon). It is designed to improve glucose regulation and achieve more potent weight loss compared to other currently available medications.

Retatrutide 30MG Vial

Retatrutide 60MG Vial

## BENEFITS

- ✓ Powerful reduction of body weight
- ✓ Improved blood glucose control
- ✓ Reduced insulin resistance
- ✓ Lowers HbA1c in patients with type 2 diabetes
- ✓ Enhances satiety and appetite control
- ✓ Potential improvement in lipid profile (cholesterol and triglycerides)
- ✓ Promotes fat burning and accelerates metabolic rate
- ✓ Weekly dosing to support adherence

# NAD+

NAD+ is an essential coenzyme present in all living cells and plays a critical role in metabolism, energy production, and DNA repair.

NAD+ 500MG Vial

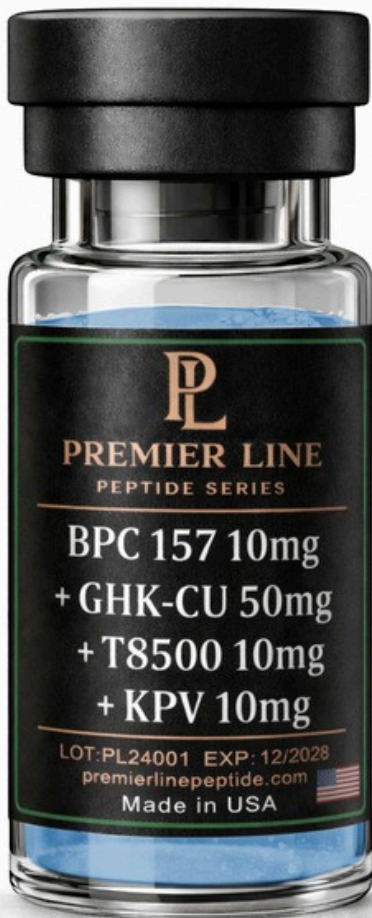

NAD+ 1000MG Vial

## BENEFITS

- ✓ Increases cellular energy production
- ✓ Improves mitochondrial function
- ✓ Supports DNA repair
- ✓ Aids physical and mental recovery
- ✓ Supports cognitive function and memory
- ✓ Contributes to improved metabolic health
- ✓ Potential anti aging effects
- ✓ Strengthens immune system function

# KLOW Blend

KLOW is a synergistic peptide blend designed to optimize the body's healing processes, reduce inflammation, and enhance overall cellular recovery. Formulated with GHK-CU, TB-500, BPC-157, and KPV

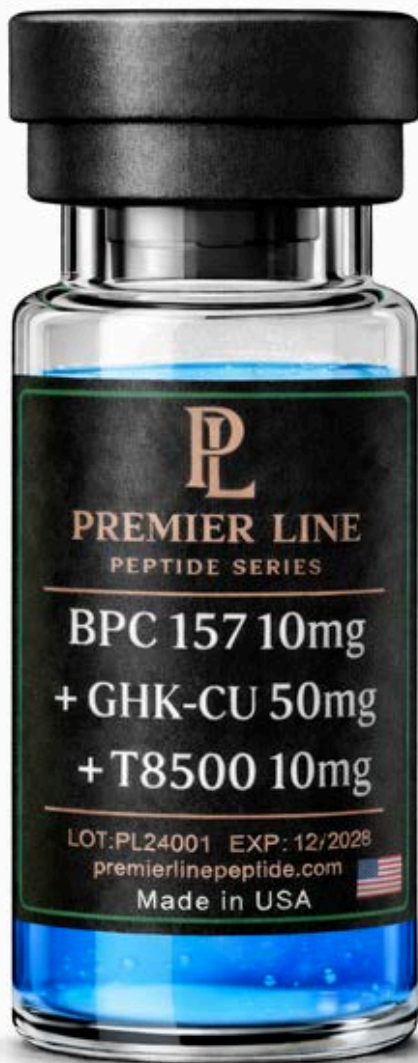

KLOW Vial

## BENEFITS

- ✓ Increases collagen production
- ✓ Improves skin and hair quality
- ✓ Supports wound healing and angiogenesis
- ✓ Accelerates healing of muscles, tendons, and intestinal lining
- ✓ Reduces inflammation and enhances recovery
- ✓ Promotes cellular migration
- ✓ Improves muscular and neural regeneration
- ✓ Helps modulate immune response
- ✓ Supports gut and skin health

# GLOW Blend

GLOW is a premium multi-peptide blend formulated to support skin regeneration, hydration, and overall aesthetic performance. Designed to promote a smoother, firmer, and more radiant appearance.

GLOW Vial

## BENEFITS

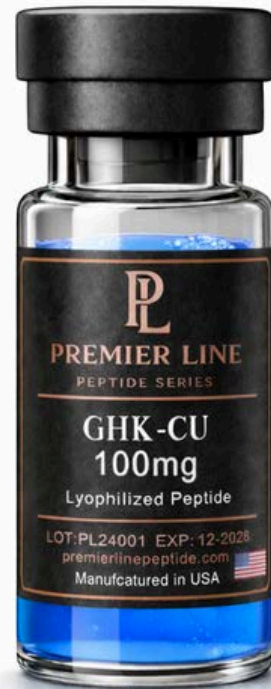

- ✓ GHK-Cu – collagen & skin repair support
- ✓ BPC-157 – tissue regeneration support
- ✓ Supports collagen synthesis and skin repair
- ✓ TB-500 – cellular recovery and repair
- ✓ Enhances elasticity and hydration
- ✓ Promotes smoother and more radiant skin
- ✓ Improves muscular and neural regeneration
- ✓ Supports overall aesthetic performance
- ✓ Elevate Your Skin to Its Prime

# GHK-CU

GHK-CU is a naturally occurring peptide known for its regenerative, anti-aging, and tissue-repair properties, commonly used to support skin health, healing, and overall cellular recovery.

GHK-Cu 50mg Vial

GHK-Cu 100mg Vial

## BENEFITS

- ✓ Skin rejuvenation
- ✓ Collagen stimulation
- ✓ Wound healing support
- ✓ Improves skin elasticity and firmness
- ✓ Hair growth stimulation
- ✓ Antioxidant properties
- ✓ Supports brain health
- ✓ Supports tissue repair and regeneration

# GLUTATHIONE

Glutathione is a master antioxidant naturally produced by the body and composed of three amino acids: glutamine, cysteine, and glycine. It plays a vital role in cellular protection, detoxification, and overall health maintenance.

Glutathione 1200MG Vial

## BENEFITS

- ✓ Liver detoxification and heavy metal elimination
- ✓ Strengthens immune defense against infections
- ✓ Helps maintain youthful skin and reduces wrinkles

## BENEFITS

- ✓ Powerful antioxidant protection
- ✓ Reduces oxidative stress
- ✓ Skin brightening and whitening effects
- ✓ Reduces fatigue and improves vitality

Glutathione 1500MG Vial

# SEMAX

Semax is a peptide developed in Russia to provide neuroprotective and cognitive enhancing effects without ACTH hormonal activity. It is approved in Russia for stroke recovery, cognitive impairment, ADHD, anxiety, and optic nerve disorders. Among biohackers, it is widely used as a nootropic to enhance focus, mood, creativity, and neuroprotection.

## BENEFITS

- ✓ Improved attention and short term memory
- ✓ Relief of depressive symptoms
- ✓ Enhanced mental focus
- ✓ Useful in ADHD management
- ✓ Increased brain derived neurotrophic factor (BDNF) levels
- ✓ Nootropic effects and cognitive enhancement
- ✓ Improvement of non proliferative diabetic neuropathy
- ✓ Neuroprotection against stress and neural damage
- ✓ Support during stroke or hypoxia recovery
- ✓ Reduction of anxiety and stress levels
- ✓ Improvement of optic neuropathy related to glaucoma

Semax 10MG Vial

# SELANK

Selank is a synthetic peptide derived from human tuftsin, used in Russia to reduce anxiety and enhance cognitive function. It acts as an anxiolytic and nootropic agent, providing calming effects without the sedative or withdrawal effects associated with benzodiazepines.

Selank 10 mg vial

## BENEFITS

- ✓ Anxiolytic effects
- ✓ Increased curiosity
- ✓ Enhanced sensory perception
- ✓ Improved mental focus
- ✓ Regulation of noradrenergic and serotonergic systems
- ✓ Reduced stress levels
- ✓ Enhanced antiviral function without adverse effects
- ✓ Improved cerebral energy
- ✓ More stable mood
- ✓ Improved learning capacity and memory processes

# EPITALON

Epitalon is a synthetic tetrapeptide originally derived from epitalamin, a peptide of the pineal gland. It is known for activating telomerase, lengthening telomeres, normalizing melatonin secretion, strengthening immune function, and protecting against oxidative stress. It is one of the most extensively studied anti aging peptides, supported by decades of Russian research.

## BENEFITS

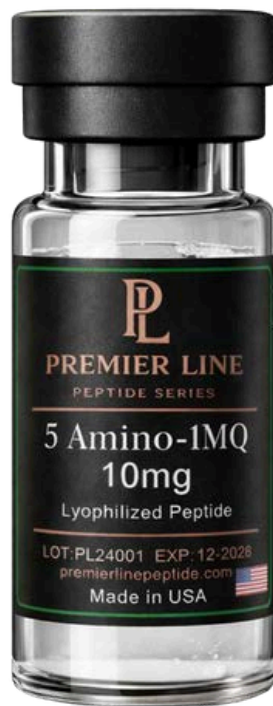

- ✓ Promotes deeper and higher quality sleep
- ✓ Restores circadian rhythm and sleep wake cycle
- ✓ Enhances melatonin secretion
- ✓ Modulates gonadotropin hormone levels
- ✓ Reduces risk of age related neurodegenerative diseases
- ✓ Strong antioxidant action against free radicals
- ✓ Reduces tumor development risk
- ✓ Improves immune system function
- ✓ Accelerates wound healing
- ✓ Enhances emotional stress resilience
- ✓ Stimulates protein synthesis for muscle growth and strength

Epitalon Vial

# 5-AMINO-1MQ

5-Amino-1MQ is an NNMT inhibitor that increases NAD+ levels, improves mitochondrial function, and reprograms metabolism to enhance fat burning without stimulant effects. It is used for fat loss, energy optimization, metabolic enhancement, and anti aging support.

5-AMINO-1MQ 10MG Vial

## BENEFITS

- ✓ Accelerates fat burning, particularly visceral fat
- ✓ Improves exercise endurance and recovery
- ✓ Increases basal energy expenditure, even at rest
- ✓ Enhances insulin sensitivity and glucose regulation
- ✓ Boosts NAD+ production for cellular energy
- ✓ Potential longevity and cellular health benefits

# MOTS-C

MOTS-C is a mitochondrially derived peptide encoded in mitochondrial DNA. It plays a key role in metabolic regulation, insulin sensitivity improvement, fatty acid oxidation, and cellular energy production.

MOTS-C 10MG Vial

## BENEFITS

- ✓ Promotes fatty acid oxidation
- ✓ Reduces fat storage
- ✓ Enhances mitochondrial function and ATP production
- ✓ Improves physical performance, especially under fatigue
- ✓ Improves insulin sensitivity

## BENEFITS

- ✓ Lowers blood glucose levels
- ✓ Protects against oxidative stress
- ✓ Improves cellular longevity
- ✓ Reduces neuroinflammation and supports cognitive function
- ✓ Enhances cellular homeostasis and metabolic adaptability

MOTS-C 50MG Vial

# TESAMORELIN

Tesamorelin stimulates the natural production of growth hormone (GH) and IGF-1, supporting visceral fat reduction, metabolic improvement, and body recomposition.

## BENEFITS

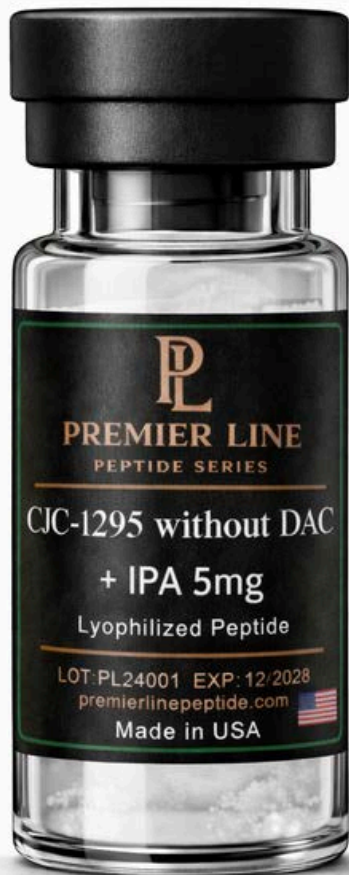

- ✓ Reduces visceral abdominal fat
- ✓ Stimulates natural growth hormone release
- ✓ Supports muscle mass preservation and gain
- ✓ Improves lipid metabolism
- ✓ Increases energy and vitality
- ✓ Enhances overall body composition
- ✓ Supports metabolic and cardiovascular health

TESAMORELIN 10MG VIAL

# CJC-1295 + IPAMORELIN

CJC-1295 combined with Ipamorelin is a synergistic peptide blend designed to optimize growth hormone release. This combination supports improved sleep quality, energy levels, muscle tone, recovery, and healthy aging.

CJC-1295 + Ipamorelin 20MG Vial

## BENEFITS

- ✓ Deeper, uninterrupted sleep
- ✓ Stable energy levels throughout the day
- ✓ Improved concentration
- ✓ Lean muscle development and fat reduction
- ✓ Enhanced recovery after physical stress or training
- ✓ Visible improvements in skin tone, hair strength, and vitality

# PT-141

PT-141 is a synthetic peptide used to treat certain forms of sexual dysfunction by acting on central nervous system pathways responsible for sexual desire and arousal, rather than targeting blood flow.

PT-141 Vial

## BENEFITS

- ✓ Enhances sexual desire and arousal
- ✓ Improves sexual satisfaction
- ✓ Non hormonal treatment option

# AOD 9604

AOD 9604 is a peptide fragment designed to support fat metabolism by targeting pathways involved in lipolysis and fat oxidation, without affecting blood sugar levels.

AOD 9604 Vial

## BENEFITS

- ✓ Supports fat loss and metabolism
- ✓ Helps reduce stubborn fat areas
- ✓ Preserves lean muscle mass

# BPC 157 + TB 500

BPC 157 + TB 500 is a synergistic peptide combination designed to support the body's natural healing processes, targeting recovery, tissue repair, and inflammation response.

BPC-157 10MG + TB-500 10MG Vial

## BENEFITS

- ✓ Supports muscle and tissue repair
- ✓ Promotes faster healing response
- ✓ Helps reduce inflammation

# BPC 157

BPC 157 is a peptide known for its role in supporting the body's natural repair processes, assisting in tissue recovery, inflammation balance, and overall regenerative function.

BPC-157 Vial

## BENEFITS

- ✓ Supports muscle and tissue repair
- ✓ Promotes faster healing response
- ✓ Helps reduce inflammation

# HCG 5000

HCG is a peptide hormone that supports the body's natural hormone signaling, helping maintain balance, energy levels, and overall performance.

HCG 5000 IU Vial

## BENEFITS

- ✓ Supports hormonal balance
- ✓ Helps maintain energy and vitality
- ✓ Supports recovery and performance

# HGH

HGH is a peptide hormone that plays a key role in growth, recovery, and body composition, supporting muscle development, metabolism, and overall vitality.

HGH 24 IU Vial

HGH 36 IU Vial

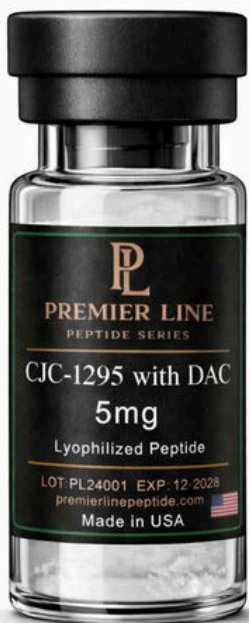

## BENEFITS

- ✓ Supports lean muscle development
- ✓ Enhances recovery and performance
- ✓ Promotes fat metabolism

# CJC DAC AND NO DAC

CJC-1295 (with DAC) is a long-acting peptide designed to support extended growth hormone release, contributing to improved recovery, body composition, and overall performance.

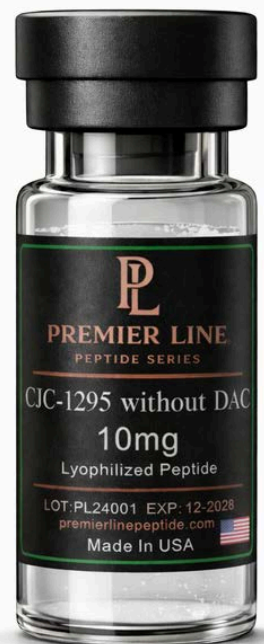

CJC-1295 (no DAC) is a short-acting peptide designed to support the body's natural pulsatile release of growth hormone, offering more controlled and flexible use.

**CJC-1295 (DAC)  
5MG Vial**

**CJC-1295 (No DAC)  
5MG Vial**

**CJC-1295 (No DAC)  
10MG Vial**

## BENEFITS

- ✓ Supports natural GH pulses
- ✓ Enhances recovery cycles
- ✓ Short-acting precision support

# IPAMORELIN

Ipamorelin is a selective peptide designed to support the body's natural growth hormone release, promoting recovery, improved sleep, and optimized body composition without overstimulation.

IPAMORELIN 5MG Vial

IPAMORELIN 10MG Vial

## BENEFITS

- ✓ Supports natural growth hormone secretion
- ✓ Enhances recovery and sleep quality
- ✓ Promotes lean muscle development
- ✓ Supports overall performance and vitality

# SEMAGLUTIDE

Semaglutide is a peptide designed to support weight management by regulating appetite and supporting metabolic function, contributing to improved body composition.

SEMAGLUTIDE 20MG Vial

SEMAGLUTIDE 30MG Vial

## BENEFITS

- ✓ Supports appetite regulation
- ✓ Promotes weight loss and control
- ✓ Enhances metabolic function
- ✓ Supports long-term body composition
